

 VETRAZZO

Each Vetrazzo slab is

HANDCRAFTED IN THE USA FROM 100% RECYCLED GLASS.

ABOUT US — Our story began in 1996 when a brilliant scientist from Berkeley, California, invented a brand new product. Fascinated by the properties of glass, he developed an innovative mix of recycled glass that could be used to create highly durable, beautifully colored slabs. Since then, we have introduced dozens of new colors and have contributed to thousands of residential and commercial projects both in North America and overseas!

ECO-FRIENDLY AND LOCALLY SOURCED — At Vetrazzo, sustainability is more than a concept; it is at the very heart of what we do. Back when “green” still only referred to a color, Vetrazzo was already contributing to reduce glass waste by repurposing a surprising variety of materials like traffic lights, jars, automobile windshields, glass from skyscrapers, beer and wine bottles, and stained glass.

Vetrazzo products can contribute towards satisfying credits under LEED®.

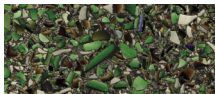

CLASSIC COLLECTION

Made with a cement base, each original slab is handcrafted by 8 different artisans. Perfect for indoor and outdoor applications, Vetrazzo slabs are unique masterpieces and will bring you joy every single day!

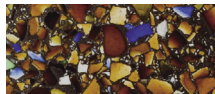

- ▶ Cement base
- ▶ 3 cm
- ▶ Indoor & outdoor use*
- ▶ 9' X 5' slabs
- ▶ Gloss, patina, sea pearl finishes

**If you reside in a northern climate, please see the freeze/thaw section of our technical specification for more information.*
